

# CAROLINE CONTE DA SILVA

## FULL STACK DEVELOPER

### • PROFILE •

This year I devoted myself intensely to programming, starting with a self-taught learning path and solidifying my skills through FullStack training. My move to Italy was a significant challenge that revealed an inner strength and problem-solving ability that I never thought I possessed. Facing the cultural change taught me the importance of resilience and flexibility, demonstrating that my determination surpasses every obstacle.

The last 10 years of work experience at the same office have significantly taught me to work effectively in a team, to take on new responsibilities, to solve a variety of problems, and to plan and organize my work comprehensively.
